DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over U. S. patent 6,956,834 to Stanwood et al.

Stanwood teaches a processor – a base station – with a medium access control. See col 6 lines 20+. It is not explicitly stated that a wake packet filtering system is not included; however, it would have been obvious to one of ordinary skill in the art at the time of the invention that it would not be included, since it would not be desirable to power down the base station in view of its important task of managing terminals (cpe's) to communicate.

3. Claims 1 – 11 and 13 – 20 are allowed.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Blount whose telephone number is 571-272-3071. The examiner can normally be reached on M-F 9:00 - 5:30.
